

POWER CONDITIONING CORDS™

Noise Filtering Array™
with Composilex™
technology

CLOSEST TO THE ULTIMATE PURITY OF BATTERY POWER

Wireworld power cords are designed to solve a completely different set of problems than audio and video cables. An ideal audio or video cable would pass the entire frequency range without alteration. However, an ideal power cord would pass only the 50Hz or 60Hz AC power, while blocking all other frequencies, thus preventing power line noise and harmonics from degrading the sound and imaging quality of the system. Accordingly, our design objective and test methodology for these power cords was to provide sound and image quality that would be closest to the ultimate purity of battery power.

To achieve that objective, we developed the Noise Filtering Array™, a unique internal structure incorporating Composilex™ insulation materials, which maximizes inductive and capacitive filtering to absorb power line noise and damp the electrical resonances that other cords and power conditioners cannot tame. Among the innovations of this design are dual low-impedance shields, which are closely coupled to the conductors to cancel unwanted energy. Furthermore, their elegant connectors feature silver-clad contacts, for the quietest and lowest loss connections available.

The previous generations of Wireworld power cords earned numerous awards by making consistent improvements in audio and video quality. The Series 5² power cords are even more effective and much more flexible than their predecessors, making dramatic improvements in the imaging, dynamic range and resolution of both audio and video components. The five models differ only in their conductor material, as the smoother current flow of superior conductors provides additional improvements in sound and image quality.

GOLD ELECTRA™ 5²
Ohno Continuous Cast®
solid silver

SILVER ELECTRA™ 5²
OCC® silver-clad copper

ELECTRA™ 5²
OCC® copper

AURORA™ 5²
Silver-clad OFC

STRATUS™ 5²
Oxygen-free copper

MATRIX™

Shielded Power Cord Extender

- Power inlet is an IEC 320 male. • Rack mount brackets included.
- Extends the benefits of Wireworld power cords to corded components.
